

# 31-Day Unit-Dose Medication Management System

## Designed With Pharmacy Workflow Efficiency in Mind

To meet the needs of today's busy pharmacy, our monthly unit-dose card comes in two versions – a one-piece panel and grid combination for manual preparation, and a pre-separated panel and grid design that streamlines filling in automated workflow technologies for high-volume pharmacies with automation capabilities.

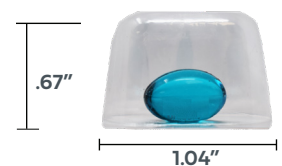

### Measures 6" (Wide) x 9" (Tall)

### Grid Pre-Separated for Automated Filling Version

- 1 Large top area accommodates all industry standard single-dose medication labels
- 2 Custom-print your card to showcase your brand and messaging (or to denote the packaging of narcotics)
- 3 Alignment cuts on both sides of the card facilitate assembly in the SynMed tray – both right and left-handed technicians
- 4 Reorder "ribbon" reminds patients and caregivers to re-fill prescriptions
- 5 Space to record important dispensing details
- 6 "Not child resistant" statement is pre-printed
- 7 Easy-puncture foil provides tamper-evident storage for medication
- 8 Easy-to-remove liner and permanent adhesive provide a secure seal without requiring a heat seal press
- 9 31 cavities hold a full month's worth of medication

### Approved for Use in SynMed® Technology

Flexibility to choose one of three blister sizes to meet varying dispensing requirements (XL blister shown)
