UNITED STATES

Multi-Dose

QUBE

AUTOMATION COMPATIBILITY

▶ Manual and Automated Filling

Compatible with:

- SynMed® XF, Ultra and Assist (tray holds eight (8) Qube blisters; SynMed Ultra fills two trays at a time)
- BlistAssist® (tray holds two (2) Qube blisters)

FEATURES

- Weekly multi-medication manager: four daily doses for seven days
- High-capacity square blisters with rounded edges (larger morning and night blisters to match most common medication regimes: 1.22"x1.03"x0.87")
- Clear view of medications for easy fill and check
- Accommodates a range of pharmacy labels
- Customizable with pharmacy branding

BENEFITS

- Tamper-evident design helps prevent unintended access
- Each blister accommodates a large number of medications
- Clear instructions make it easy for patient to use
- Potential to capture incremental sales for customers looking to fully utilize the Qube's dose management capabilities (ex. vitamins, supplements)
- Rounded blisters facilitate filling in automation equipment

IDEAL FOR

- Patients, especially seniors and those with chronic diseases, managing a complex medication regime
- High-volume pharmacies with or considering automation capabilities

QUBE31

AUTOMATION COMPATIBILITY

▶ Manual and Automated Filling

Compatible with:

- SynMed XF, Ultra and Assist (tray holds 10 Qube31 blisters; SynMed Ultra fills two trays at a time)
- Parata SmartCardRx™ (tray holds four (4) Qube31 blisters)

FEATURES

- Monthly multi-medication manager: one daily dose for up to 31 days
- High-capacity square blisters with rounded edges: 1.01"x0.87"x0.87"
- Clear view of medications for easy fill and check
- Accommodates a range of pharmacy labels
- Customizable with pharmacy branding on optional front cover

BENEFITS

- Tamper-evident design helps prevent unintended access
- Each blister accommodates a large number of medications
- Clear instructions make it easy for patient to use
- Rounded blisters facilitate filling in automation equipment
- More efficient than dispensing multiple single-dose cards for one patient

IDEAL FOR

- Patients who require optimum medication capacity for one daily dose
- High-volume pharmacies with or considering automation capabilities

FLEXRX™ (WITH COVER) AND FLEXRX™ LIGHT

AUTOMATION COMPATIBILITY

▶ Manual and Automated Filling

Compatible with:

- SynMed XF, Ultra and Assist (tray holds eight (8) FlexRx blisters; SynMed Ultra fills two trays at a time)
- Parata SmartCardRx (tray holds two (2) FlexRx blisters)
- BlistAssist (tray holds two (2) FlexRx blisters)

FEATURES

- Available in two formats: weekly multi-medication manager with four daily doses for seven (7) days and a monthly multi-medication manager with one daily dose for up to 32 days
- Perforated blister cavities
- Medication information printed on each individual cavity
- Permanent moisture-resistant adhesive label with convenient push-through access to medications
- Large-capacity blisters can hold multiple medications and vitamins: 1.64"x0.7"x0.87"
- Customizable with pharmacy branding on optional front cover

BENEFITS

- Tamper-evident design helps prevent unintended access
- Detachable cavities offer patients portability and the convenience of carrying individual doses
- Rounded blisters facilitate filling in automation equipment
- Optional customizable cover protects medication while offering important branding opportunity

IDEAL FOR

- Active patients "on-the-go"
- Assisted living facilities
- Retirement communities
- Long-term care homes
- High-volume pharmacies with or considering automation capabilities

31-DAY SINGLE DOSE

AUTOMATION COMPATIBILITY

▶ Manual and Automated Filling

Compatible with:

- SynMed XF, Ultra and Assist (tray holds 10 31-day blisters; SynMed Ultra fills two trays at a time)

FEATURES

- Monthly single-dose medication manager: one daily dose for up to 31 days
- Two-panel card – panels are pre-separated for use in automated filling technology
- Three blister sizes available
- Comes with extra-large blister to accommodate medication of any size: 1.04"x0.62"x0.67"

BENEFITS

- Automation format designed specifically for workflow technologies to streamline filling
- Tamper-evident design helps prevent unintended access
- Facilitates narcotic prescription filling
- Can be used for stock inventory or patient-specific medication

IDEAL FOR

- Long-term care and assisted living facilities, seniors' residences
- Patients who require a tool for a less complex medication regime or who take narcotics
- Patients whose medication is reviewed and adjusted less frequently

BRANDED SOLUTIONS FOR STRIP PACKAGING
