

FlexRx™ One Medication Management System

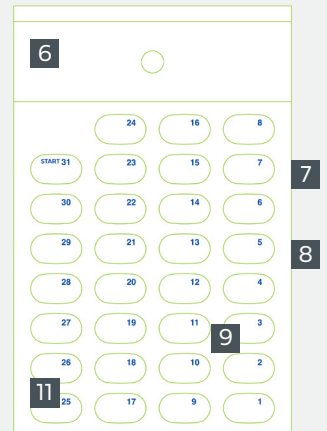

The quick, easy and more sustainable unit-dose automation solution

Designed to accelerate automated workflow, the FlexRx One's simple structure means a faster and easier seal compared to heat seal options. It's the first and only unit-dose adherence package designed with a recyclable Bio-PET blister made from renewable resources, offering a more eco-friendly option for your patients.

Front When Assembled

Back When Assembled

- 1 Ample room to insert your brand messaging directly on the package
- 2 Available in both count-down and count-up formats for added flexibility
- 3 Shaded column visually cues when it's time to re-order
- 4 31 large cavities per package to accommodate a wide variety of medication sizes
- 5 Printing on both sides of every cell offers an instant count of remaining filled cavities
- 6 Dedicated patient label panel protected by the blister
- 7 Standard letter size label (8.5" x 11") assures compatibility with all laser printers. 2 labels per sheet
- 8 Ribs/bevels around the blister create easy alignment guides for label application
- 9 Blister corners absorb energy when medication is dropped during filling, decreasing the risk of "jumping" medications
- 10 Perforated seal on all cavities with easy push-and-tear access to medications
- 11 New medically approved Bio-PET blister contains 33% plant-based PET

Approved for use in SynMed® technology. Compatible with other automation systems.
